

'Deidealised Epistemology' Bibliography

I have tried to classify the various suggestions. Some of these classifications are contentious or arbitrary (as is any classificatory scheme), and some pieces belong in more than one section. If you have suggestions for changes, let me know. I *think* I have provided references for every book/article that was suggested; if I missed something out, also let me know. In some cases, a name was suggested; I have listed the work that seemed most relevant. I have added a section for 'other relevant material' at the end with links to relevant projects/bodies of literature/etc.
